

Cookies

VideoDone uses cookies to be able to improve user experience, ensure smooth operation and functionality of its sites, etc. We would like to invite you to read more about the cookies used on our sites.

What are cookies?

Cookies are small text files that an Internet browser (e.g., Internet Explorer, Firefox, Safari, Google Chrome etc.) saves in your end device (computer, mobile phone, tablet) to identify the browser, or any information or settings saved in it. Thus, by means of cookies, a site can save individual settings, recognize the user and react accordingly. You may disable or limit the use of cookies, but it will not be possible to fully enjoy the functionality of the respective site without them.

What cookies do we use and for what purpose?

Depending on the functionality and the purpose there are strictly necessary cookies, functional cookies, analytic cookies and target (advertising) cookies.

Strictly necessary cookies

You need these cookies to freely access and browse a site and enjoy its functionality, including receiving service related information and purchasing services, while we need them to be able to complete your requests. These cookies identify your device, but do not disclose your identity, they do not collect or compile any information, either. Without these cookies the site will not be fully functional, e.g., it will not be able to provide the information you need, ensure that you receive any services ordered online or watch a requested video.

The cookies are stored in your device until the web browser is closed. Pursuant to the Law On Information Society Services the strictly necessary cookies are placed automatically. But if you decide to use the functionality offered by a browser and disable the cookies, please remember that the site will not be fully functional.

Functional cookies

Any site uses functional cookies to remember your settings and selections for you to be able to enjoy the site even more. These cookies are permanently stored in your device.

Analytic cookies

Analytic cookies collect information about your use of the site, and determine the sections that you visit most, including the content that you choose during browsing. This information is used for analytical purposes to determine what is of interest to users to improve the functionality of the site and make it more user friendly. Analytic cookies identify your device, but do not disclose your identity.

In some cases a few of our analytic cookies are managed on our behalf, according to our instructions and solely for the stated purpose by third parties, e.g. Google Analytics.

Target (advertising) cookies

We use target (advertising) cookies to collect information about the sites that you visit and offer you our services or services of our partners that are of interest to you, or to send you targeted offers depending on your searches. Usually these cookies with our consent and for the stated purpose are placed by third parties, e.g. Google AdWords. Target cookies are permanently stored in your end device.

Confirming and disabling of cookies

When you visit our site, a pop-up window appears notifying you of the use of cookies on the site. By clicking OK you confirm that you have read the information about cookies and their purpose. It is possible to restrict or delete cookies in the security settings of any Internet browser. But please note – if you choose to disable the strictly necessary cookies, the site will not be fully functional.

For more information, please go to:

<http://www.youronlinechoices.eu> if you are based in the EU; or

<http://www.aboutads.info/choices/> if you are based in the US.

To opt out of cookies from Google: <https://www.google.com/settings/ads>

If you want to delete or disable other cookies, see: www.allaboutcookies.org/manage-cookies

If you have any questions in regards to disabling or updating your cookies, feel free to contact Eugene Mankov, CEO of VideoDone at eugene.mankov@videodone.io using keyword "Cookie" in the subject.
